Professional Summary

Backend-focused developer building AI services in **Python** and **FastAPI**, with hands-on experience in **RAG**, **LLM integration**, **PostgreSQL/pgvector**, **LangGraph**, **Redis** caching and **JWT**-based access control. Three months' production experience shipping and maintaining a live e-commerce platform, with a focus on server-side validation, API integrations, security and production debugging.

Technical Skills

- **Languages:** Python, SQL, TypeScript, JavaScript
- **Backend:** FastAPI, Pydantic, REST APIs, JWT, Role-Based Access Control, Node.js, Express.js
- **AI / LLM:** RAG, LLM Integration, Embeddings, Vector Search (pgvector), LangGraph, Structured Outputs, Prompt Grounding
- **Databases:** PostgreSQL, pgvector, Redis, SQLAlchemy, Alembic, Firestore, Prisma ORM
- **Tools:** Docker, Docker Compose, pytest, Git, GitHub, Postman

Experience

- **Web Developer Intern** — Jun 2026 – Sep 2026
  Sergul IT Services — *Remote*
  - Built and maintained a live customized-gifting e-commerce platform in **Next.js 15**, **TypeScript**, **Firebase Auth** and **Firestore**, covering product catalog, customization, cart, checkout, orders and admin operations.
  - Integrated **Razorpay** and **Shiprocket** behind server-only provider layers, implementing live courier rates, AWB generation, pickup requests and an idempotent tracking webhook with manual sync fallback.
  - Implemented server-side price and tax computation and **GST-compliant invoicing**, including CGST/SGST vs IGST, HSN codes, race-safe invoice numbers and immutable invoice snapshots.
  - Hardened fulfilment APIs with admin-token verification and payment-amount validation; fixed a **Firestore security rule** that allowed client-created orders and added explicit rollback for shipping API responses that returned HTTP 200 without a tracking number.
  - Resolved an **ESM/CommonJS** compatibility issue blocking Vercel deployment of the Firebase Admin SDK.

- **Freelance Web Developer** — 2024 – 2026
  Independent — *Remote*
  - Built a live student management system in **React.js** and **Firebase** with authentication, validated CRUD operations and a responsive admin dashboard.
  - Developed a live IT training and services website using **React.js**, React Router and Tailwind CSS with reusable components and client-side routing.

Projects

- **AI Support Triage API | GitHub | Live** — Sep 2026
  Python, FastAPI, PostgreSQL, pgvector, Redis, LangGraph, Docker, pytest
  - Built a **FastAPI** backend that triages support tickets by classifying requests, retrieving relevant documentation through **pgvector** similarity search, and generating cited draft replies for human review.
  - Orchestrated the pipeline with **LangGraph** (classify → retrieve → draft → score → escalate), using **Pydantic** structured outputs and streaming per-step progress to clients over **SSE**.
  - Diagnosed a hallucination where the model invented a support process absent from the documentation; introduced grounded prompting and rule-based escalation after measuring that similarity scores alone could not reliably separate answerable from unanswerable questions.
  - Reduced repeated-ticket latency from ∼2.0 s to ∼0.06 s by caching embeddings, classifications and drafts in **Redis** with model-aware keys; secured the API with **JWT**/three-role access control and added 28 **pytest** tests using injected fake LLM and embedding providers.

- **QR-Based Restaurant Ordering System | GitHub**
  React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, Docker
  - Built a QR-based restaurant ordering flow in **React.js** allowing diners to browse menus and place table orders without installing an app.
  - Developed the backend with **Node.js**, **Express.js** and **PostgreSQL** using Prisma ORM, JWT authentication and separate admin/customer roles; containerised the application with **Docker**.

Education

- **Master of Computer Applications** — KIPM College of Management, AKTU, Gorakhpur — 71.7% (2024–2026)
- **Bachelor of Computer Applications** — Vivekananda Institute of Professional Studies TC, Delhi — 86% (2020–2023)
